2. The format and basis of drawing up the financial report

The financial report has been prepared in accordance with the Accounting Act from the 29th of September 1994 (Journal of Laws from 2013. Pos.330, as amended), hereinafter referred to as "the Act".

The Foundation keeps records of expenses according to type and function, and prepares the profit and loss account in the calculation variant.

The figures in the financial report are presented in Polish zloty.

The report has been drawn up using the following simplifications for micro entities in accordance with the Act:

- a) Art. 7 paragraph. 2a - The Foundation resigns from keeping the precautionary principle in the valuation of assets and liabilities
- b) Art. 48a paragraph. 3 - The Foundation does not prepare a statement of changes in equity
- c) Art. 48b paragraph. 4 - The Foundation does not prepare a cash flow statement
- d) According to Annex No. 6 to the Accounting Act, the Foundation has provided data for comparability.

3. The accounting principles - the methods used to value assets and liabilities, measurement of financial result

a) Material Fixed Assets and Intangible Assets

Material fixed assets and non-material assets are valued at the cost of purchase, decreased by accumulated amortization and any impairment.

The purchase price of the asset is increased by the cost of improvements, consisting of the reconstruction, modernization, and expansion, causing the value in use of the asset at the end of improvements to exceed the value when purchased.

When destined for cancellation, withdrawal from usage, or other reasons that cause impairment of the material fixed asset or intangible asset, they are revaluated and the decrease in value is recorded in other operating expenses.

Depreciation is calculated using the straight-line method. In determining the depreciation period and the annual depreciation rate, the period of economic usefulness of the tangible and intangible assets is taken into account. The appropriateness of the periods and amortization rates are periodically reviewed.

The Foundation applies depreciation rates in accordance with the Legal Entity Income Tax law.

Assets with an initial value below PLN 10.000 (ten thousand) are once written off as an expense in the month of use.

Assets under construction are valued at the total costs directly attributable to the acquisition, net of write-offs for impairment.

Assets under construction are not depreciated until they are completed and put into use.

b) Investments

Investments include assets acquired to achieve economic benefits arising from the increase in the value of these assets, obtaining interest income from them, dividends (shares in profits) or other benefits, including from commercial transactions, and in particular financial assets, as well as the properties and intangible assets that are not used by the Foundation, but were acquired in order to achieve these benefits.

c) Receivables

Receivables are valued according to the amount of the due payment.

d) Inventory of Material Current Assets

The value of inventories is determined based on the purchase price, while decreases are measured using the first in, first out method.

e) Cash and Cash Equivalents

Cash in the bank and in hand is recorded at the nominal value.

f) Prepayments

Prepayments are made for costs relating to future reporting periods.

Accrued expenses – n/a

g) Equity/ own funds

The statutory fund is disclosed in the amount specified in the contract and the court register. Declared, but unpaid capital contributions are recognized as outstanding share capital contributions.

h) Provisions for liabilities

The Foundation does not make any provisions in accordance with the simplifications for micro units provided for in the Act (art. 7 paragraph. 2a).

i) Liabilities

Liabilities are recorded according to the amount of the due payment.
